

## Appendix 14

## Urban Regeneration

## **Urban Regeneration**

After the initial response to the emergency has passed it is expected that Urban Regeneration will be facilitated in several ways:

### Private Enterprise

As the name suggests this response would be led by private industry and will cover both commercial and residential properties. It would be expected that the majority of this type of regeneration would be financed by insurance claims.

### Government Led

Depending on the nature and locality of the emergency some Government led regeneration may take place. Funding/ resources may also be available via Belfast Regeneration Office to help with regeneration. This funding will be conditional on meeting the selection criteria for the various schemes. Belfast Regeneration Office can be contacted on 028 9081 9836. Information on the resources available can be found on the Belfast Regeneration Office website:
