

Leaf Scramble

Have fun with this challenging game developed for autumn.

Set out a range of different types of leaves on the ground. Divide the class into two teams. As the leader shouts out the name of a leaf you want them to find, one person from each team must go to the leaves and select the correct one. This is not a race. As each team finds the correct leaf, reward them with a point. If they bring back the wrong leaf, they do not receive a point.

It is possible to use either real leaves or laminated examples.

This can also be played with seeds.

**Running
to collect
the leaf.**
