

Animal Maths

During your visit, go and explore the Ellie house (Elephant, Giraffes, Zebras and Ostrich) and see how many of these adaptations you can discover.

1) An average Zebra has up to 50 stripes.

_____ zebras were seen in the Ellie house today.

2) Look closely at the ostrich. How many toes do they have? Check the track for a hint. _____ toes.

There was _____ ostriches today.

3) Giraffes have very long necks. However, they have just 7 bones in their neck, which the same number of neck bones humans have!

There are _____ giraffes in the herd.

4) The Eastern Bongos have red, stripy coats act as excellent camouflage from predators.

Unlike most antelopes both male and female bongos have long spiralling horns.

There are _____ bongos out today.

1) How many stripes were in all together?

2) How many ostrich toes were there?

3) How many giraffe neck bones would there be altogether?

4) How many long spiralling horns could you see?
