**6. Before you submit your comments**

**7. Is the plan sound?**

Your comments should be set out in full. This will help the independent examiner understand the issues you raise. You will only be able to submit further additional information to the Independent Examination if the Independent Examiner invites you to do so.

**Q12. Do you consider the Plan Strategy to be sound or unsound?**

I believe it to be sound

**8a. Sound**

**Q13. If you consider the Plan Strategy to be sound and wish to support the Plan Strategy, please set out your comments below:**

**Reasons for support:**

The Plan is relatively sound but it does not recognise the potential for Smart Grid deployment to facilitate and further the plan. This is understandable as this is a complex, specialist area but worthy of more consideration. The cross-cutting nature of energy infrastructure can be illustrated with e.g. ITU4 talks about an increase in renewables schemes but no quantum. This is despite the availability of funding for demonstrator projects that address fuel poverty. Evidence is needed to inform this Plan. Also SP7 should be addressing Electric Vehicle deployment demonstrators as there is considerable scope for holistic benefits such as fuel poverty reductions, with concomitant improvements to health and air quality improvements that are particularly beneficial to urban dwellers.
